

# Project 1: Crowdfunding Analyzer

crowdfunding analyzer  
Project 1:

# KICKSTARTER

# Crowdfunding statistics!

Some important key takeaways:

- **\$17.2 billion** is generated yearly through crowdfunding in North America.
- The crowdfunding market is projected to grow to **\$300 billion** by 2030.
- Those **aged 24-35** are likely to participate in crowdfunding campaigns
- An average crowdfunding campaign lasts **9 weeks**.
- Kickstarter has had **319,051 completed projects**—the most overall for any platform.
- Indiegogo projects have raised an **average of \$41,634** each—the highest average amount of any platform.

# ◆ Executive Summary

# Project Summary and Concept

- This project attempts to help project creators understand where to market their project -- Kickstarter or Indiegogo?
- The purpose of this tool is to not only give project creators advice on platforms but produce some statistics that will support the advice.
- Motivation for use? - Crowdfunding offers significant investment opportunities, and individuals who are interested to start a project or are looking to invest, could use this tool to better uncover those opportunities.

# Data Techniques

- Data source was from Kaggle
  - Kickstarter Dataset: Kaggle from Mickaël Mouillé-  
<https://www.kaggle.com/kemical/kickstarter-projects>
  - Indiegogo Dataset: Kaggle from Quentin McTeer-  
<https://www.kaggle.com/quentinmcteer/indiegogo-crowdfunding-data>
- This was used due to its extensive csv dataset.

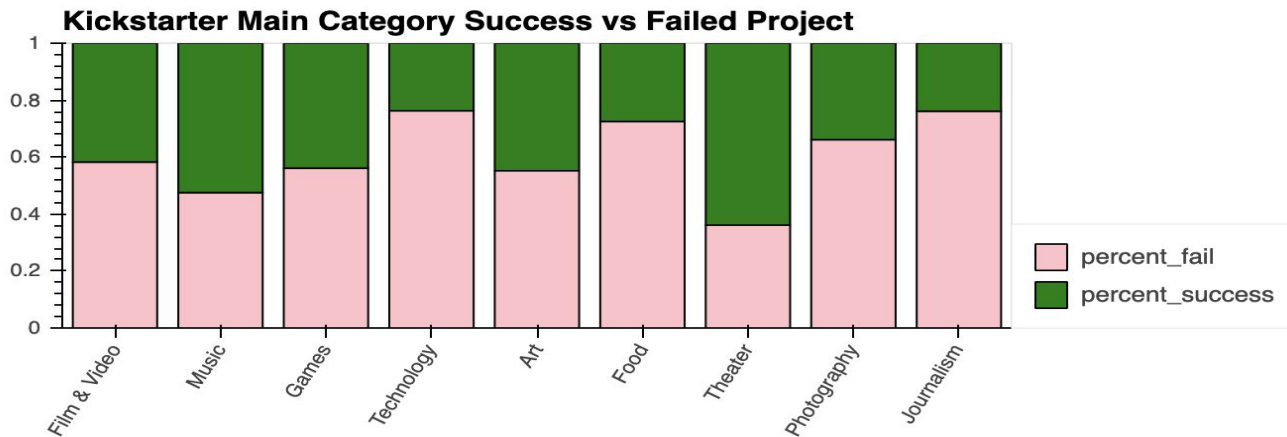

The background is a solid teal color. In the top-left corner, there are three vertical bars of varying heights, each composed of three overlapping circles. In the bottom-right corner, there are four vertical bars of increasing height, each also composed of three overlapping circles.

# ❖ **Kickstarter and Indiegogo Project Analysis**

# Percent Success vs Failed

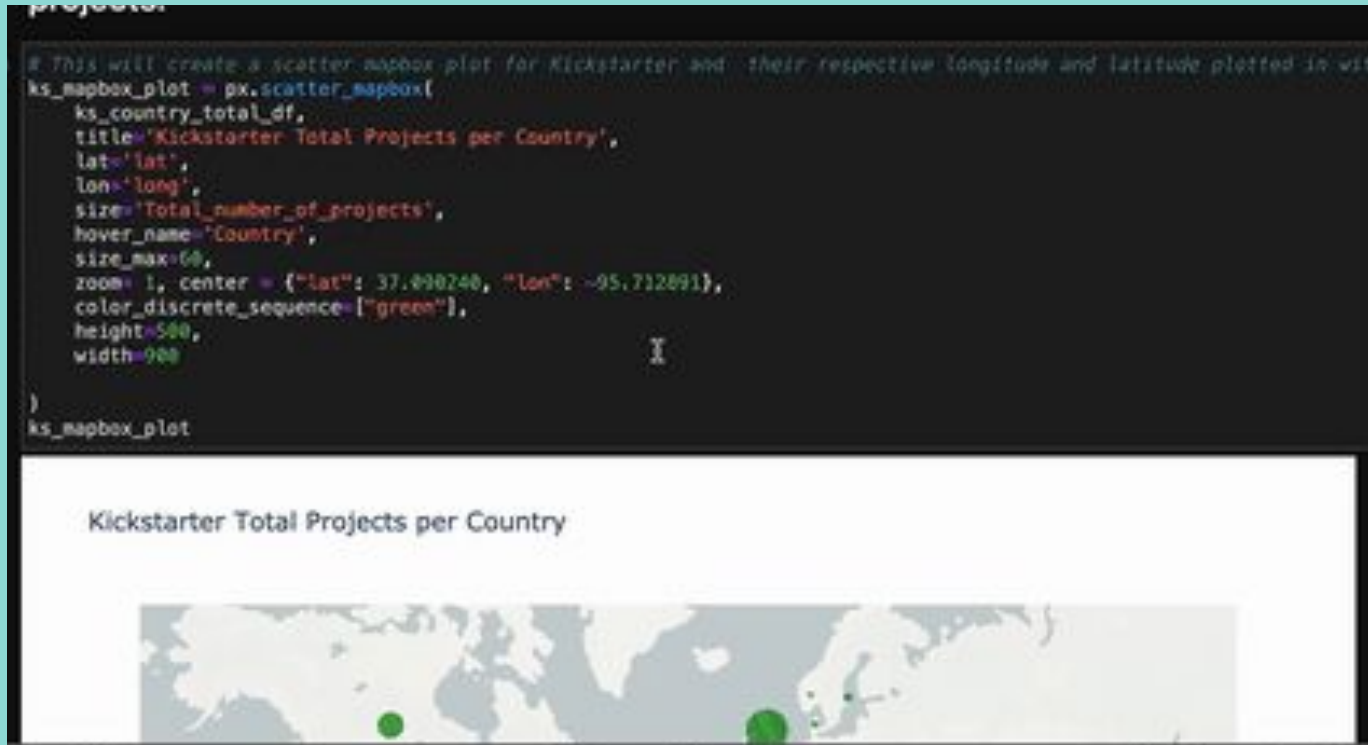

Kickstarter has more successful projects than Indiegogo.

The background is a solid teal color. In the top-left corner, there are three vertical bars of varying heights, each composed of three overlapping circles. In the bottom-right corner, there are four vertical bars of increasing height, each composed of four overlapping circles.

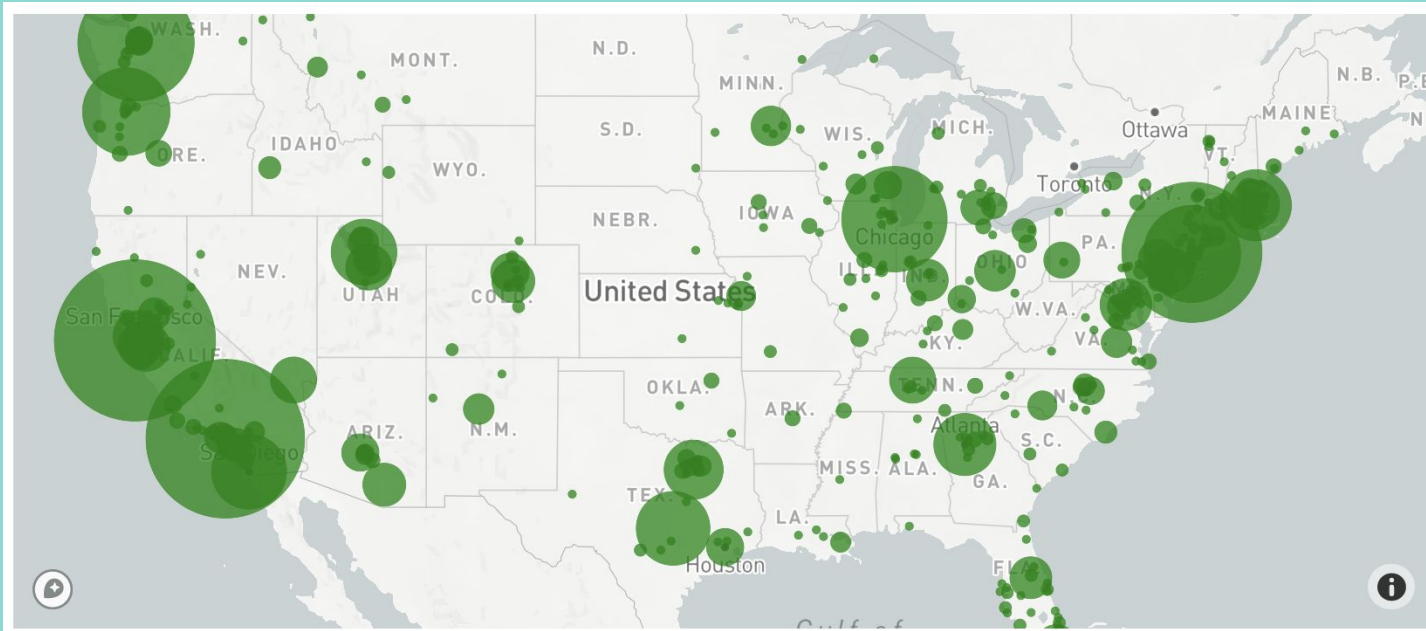

# Countries Using Kickstarter and Indiegogo

# Kickstarter and Indiegogo Projects around the World

United States still has the most created projects (for both platforms).

# Kickstarter Projects in the US Only

**Top 5 Cities:**  
1. San Francisco, CA  
2. Los Angeles, CA  
3. New York, NY  
4. Seattle, WA  
5. Chicago, IL

# Duration per Kickstarter and Indiegogo

# Duration per category - Kickstarter and Indiegogo

## Kickstarter's Average Duration Days of Each Main Category

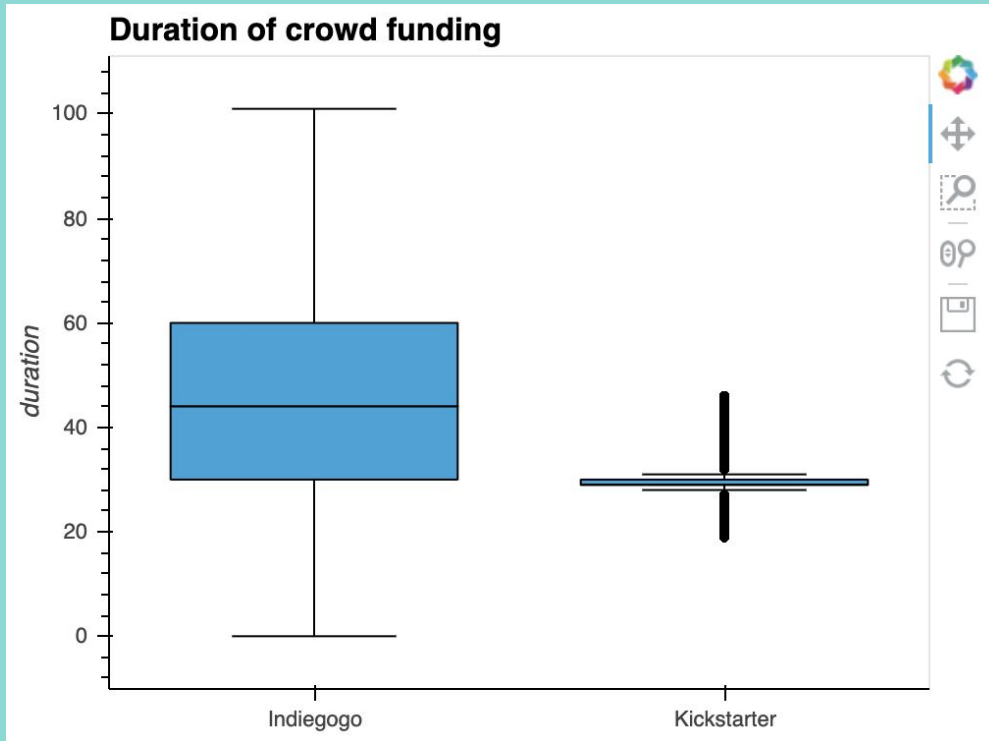

## Indiegogo's Average Duration Days of Each Main Category

Kickstarter can vary depending on the category, but Indiegogo is more stable.

# Duration Comparison: Indiegogo vs Kickstarter

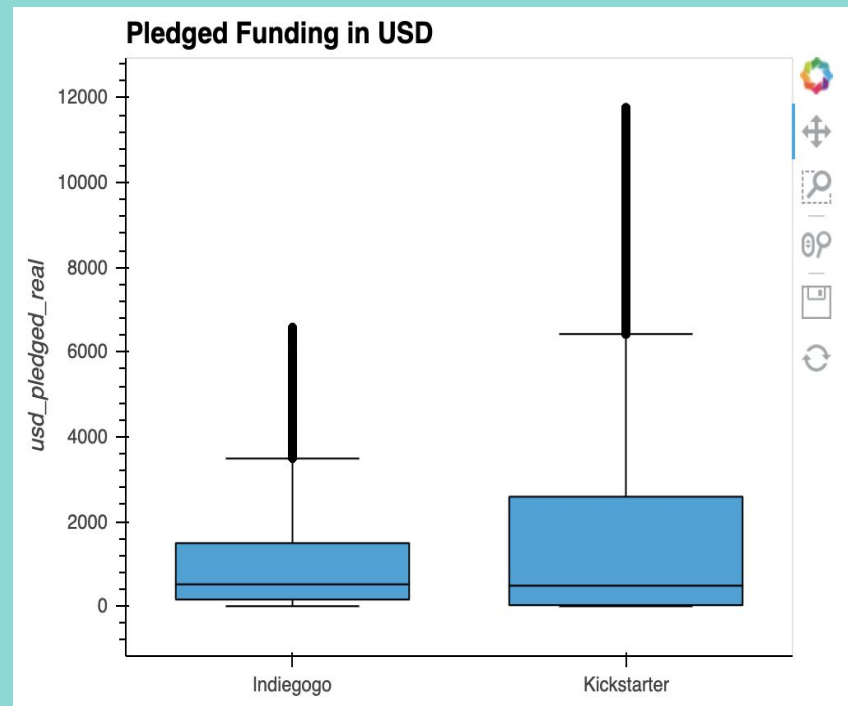

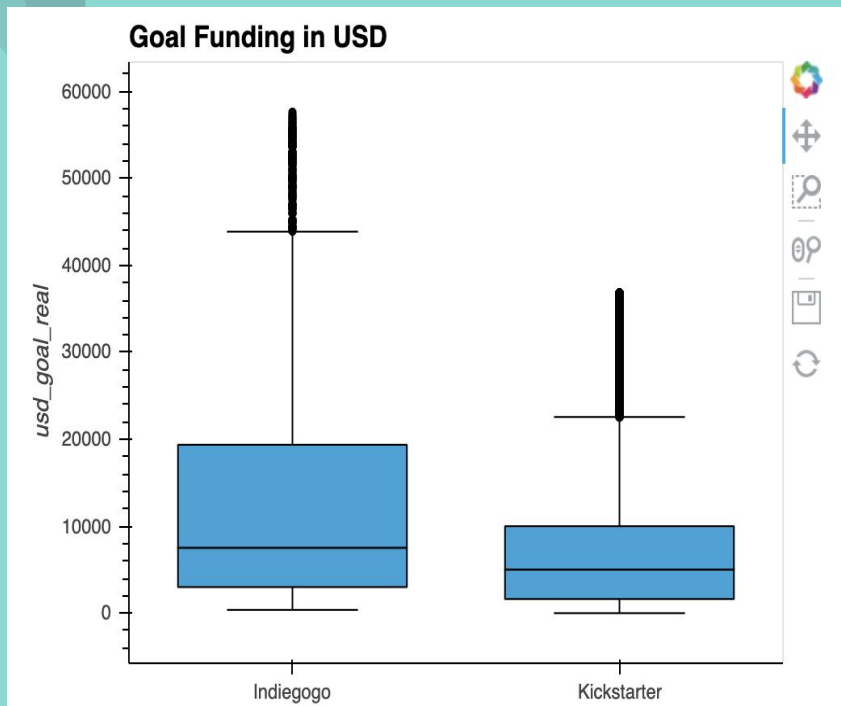

Kickstarter projects need shorter days to reach their fund goal unlike Indiegogo.

The background is a solid teal color. In the top-left corner, there are three vertical bars of varying heights, each composed of three overlapping circles. In the bottom-right corner, there are four vertical bars of increasing height, each also composed of three overlapping circles.

# Fund Pledge vs Fund Goal for Kickstarter and Indiegogo

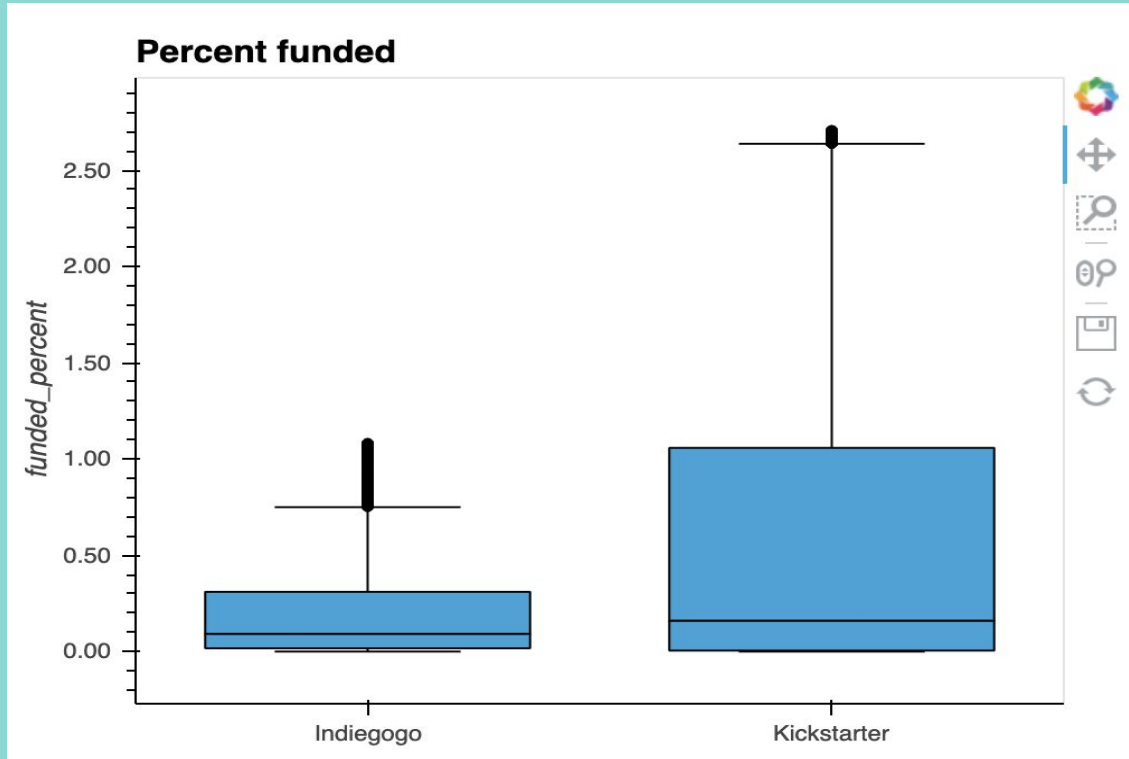

# Funding Goals vs Pledges Received

- Indiegogo project creators ask for more funding
- Kickstarter project creators receive more funding and reaches their fund goal faster.

# Percent funding reached

Kickstarter  
receives a higher  
percentage of  
their goal  
funding than  
Indiegogo

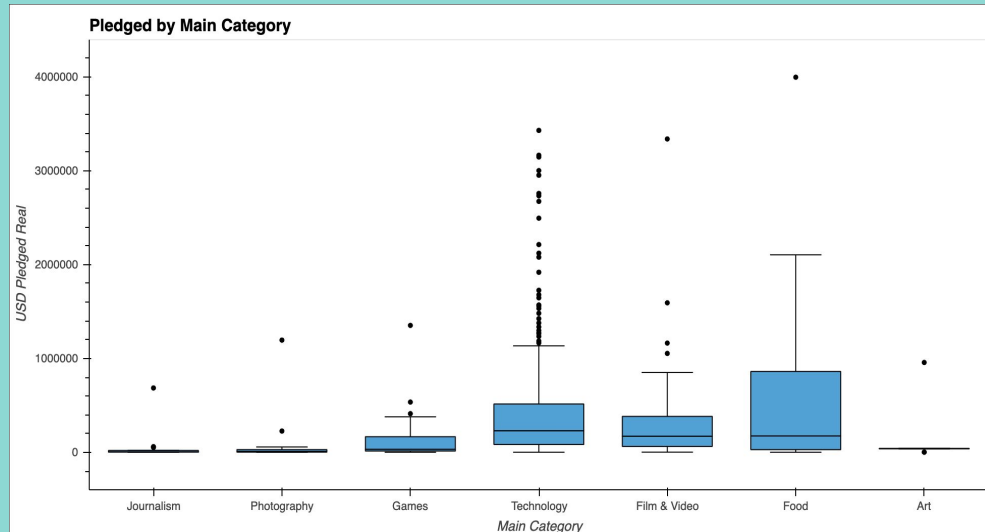

# Pledged by Category with Success

## Kickstarter

## Indiegogo

- Some categories have a wider range of total money pledged.
- Indiegogo is more variable and Theater and Music had zero successful projects.

## Conclusion

- Kickstarter has more successful projects than Indiegogo.
- Kickstarter projects need shorter days to reach their fund goal unlike Indiegogo.
- People on Kickstarter asks for less, are more realistic.

# ❖ Demo/Examples

To use Voila and Python questionnaire.

# GitHub Kanban- Task Tracker

The screenshot displays a web browser window showing a GitHub repository named 'Best-Brain-Gang / Crowdfunding\_Analysis'. The interface is in dark mode. The top navigation bar includes links for 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. Below this, the repository name is shown with 'Watch', 'Star', and 'Fork' buttons. The 'Projects' tab is selected, showing a Kanban board for 'Crowdfunding\_Analysis' (updated 28 minutes ago). The board has four columns: 'Backlog', 'To do', 'In progress', and 'Review in progress'. The 'To do' column is highlighted with a blue border and contains three tasks: 'Change profile picture for best brain gang organization on github' (marked CRITICAL), 'Create rotary bar graph', and 'Add a funding size to questionnaire'. The 'In progress' column contains one task: 'Move Boxplots to directly after summary statistics'. The 'Backlog' column has an input field and three tasks. The 'Review in progress' column is currently empty. At the bottom of each column, there is a 'Manage' link and an 'Automated as' status.

# GitHub Kanban- Task Tracker (cont.)

The screenshot shows a web browser window displaying the GitHub Kanban board for the repository 'Best-Brain-Gang / Crowdfunding\_Analysis'. The browser's address bar shows the URL 'github.com/Best-Brain-Gang/Crowdfunding\_Analysis/projects/1'. The GitHub interface includes a search bar, navigation links for Pull requests, Issues, Marketplace, and Explore, and repository statistics (Watch: 1, Star: 1, Fork: 0). The Kanban board is titled 'Crowdfunding\_Analysis' and was updated 13 seconds ago. It features four columns: 'Backlog', 'To do', 'In progress', and 'Review in progress'. The 'Backlog' column contains three tasks: 'Create rotary bar graph' (opened by cdhendy), 'Add a funding size to questionnaire' (opened by Narwhilian), and 'From small kickstarter data look into and chart categories (tech) by city/state (mapping)' (opened by Narwhilian). The 'To do' column contains two tasks: 'Change profile picture for best brain gang organization on github' (opened by cdhendy, marked CRITICAL) and 'Create a gif for kanban' (opened by jaycho, marked documentation). The 'In progress' column contains one task: 'Move Boxplots to directly after summary statistics' (opened by Narwhilian, marked enhancement). The 'Review in progress' column is currently empty. Each task card includes a title, a description, a status label, and a 'Manage' button. A URL bar at the bottom shows 'https://github.com/Best-Brain-Gang/Crowdfunding\_Analysis/issues/142'.

# Team Members and Their Tasks

01	<b>Colin Benjamin</b> <a href="#"><u>in/colinbenjamin</u></a>	<ul style="list-style-type: none"><li>• Summary statistics for both Kickstarter and Indiegogo</li><li>• Create a plotnine based on summary statistics</li></ul>
02	<b>Justine Cho</b> <a href="#"><u>in/justinecho</u></a>	<ul style="list-style-type: none"><li>• Create dataframe for Kickstarter and Indiegogo to prep for analysis</li><li>• Hvplot and scatter mapbox plot</li><li>• Wordcloud</li></ul>
03	<b>Christopher Henderson</b> <a href="#"><u>in/chris-henderson123/</u></a>	<ul style="list-style-type: none"><li>• Help design concept and user story</li><li>• Further drill-down of analysis</li><li>• Rotary bar plot</li></ul>
04	<b>Nathan Patterson</b> <a href="#"><u>in/natepatterson/</u></a>	<ul style="list-style-type: none"><li>• Data clean up of the csv files</li><li>• Create a Questionary</li><li>• Create a Streamlit dashboard</li></ul>

### Successes

- Managed to clean up the csv files for both Kickstarter and Indiegogo.
- Managed to easily get dataframe with SQL
- Found at least two new python library packages
- Proper use of Github and task tracker.

### Challenges

- Managed to clean up the csv files for both Kickstarter and Indiegogo.
- Managed to easily get the dataframes with SQL query
- Found at least two new python library packages
- Proper use of project management and Github

### Lessons Learned

- Kanban task tracker
- GitHub as a Project Management tool
- Cleaning csv data
- New python library packages-- Wordcloud, Plotnine and Streamlit

### Next Steps

- Additional topics to research:
  - Additional crowdfunding platforms
  - Additional scraped CSV files
  - Crowdfunding categories over year
- Plan for future development:
  - Build out additional features on Questionary
  - Build out a better dashboard with Voila or Streamlit
